

Tommy Loggia, owner of the brand new *Hellbent Performance Off-Road* in the Chesterfield Valley, got into the business for one simple reason: He wanted better stuff.

“Off road fabrication and performance had been a life-long interest for me,” said Loggia. “After years of buying different products that didn’t always work or didn’t satisfy my needs, I wanted to be able to supply others with quality products and be able to custom make them something to suit their needs.”

And better stuff is what Loggia and his staff at Hellbent can provide. They are the only dealer in the St. Louis area who carries Kelderman Air Lifts. If they don’t carry something, just ask and they can custom build it for your needs – but that doesn’t mean they will sell you something you don’t need.

“It is important to note that we will only sell you things that work for your vehicle,” said Loggia. “Even if the alternative is more expensive we won’t

sell you something you don’t need just to make a buck.”

The staff at Hellbent can work on Jeeps, trucks, SUVs and virtually any kind of 4x4 vehicle. They are a full service shop that only carries top of the line products and services.

So when it is time to upgrade the family SUV to an off road monster, just call Tommy Loggia and the people at *Hellbent Performance Off-Road*. They will find or build you the right parts and make sure they are installed correctly.
