

**Success In School Tomorrow Begins
With Huntington Today**

Academic skills are the stepping-stones to success for kids of all ages and grade lev-els. By teaching skills in phonics, reading, writing, math, study skills and ACT/SAT Exam Prep, *Huntington Learning Center* helps kids achieve success that lasts a lifetime. Students with weak or marginal skills tend to stumble through school, becoming caught in a cycle of struggle and frustration. Often times, all they need to break this cycle is a personalized or individualized program of instruction to bolster one or more basic skill levels. As students experience success in their program and see they can learn, suc-cess replaces failure, confidence replaces frustration, and bad grades improve.

Because each student is different, Huntington always begins with a thorough diagnostic evaluation to pinpoint weak areas. We then meet with parents privately to review test results and to recommend a personalized program of instruction. The prescription for suc-cess is unique to Huntington and has helped hundreds of thousands of children develop the skills, confidence and moti-vation unlike any other tutoring program.

Unlike traditional tutoring, which helps students in a specific subject or course, instruction at *Huntington* helps in all areas. Students do not complete traditional school work or homework while attending the center. Instead students can apply the skills we teach them to any assignment or project given in school.

Huntington Learning Center is the oldest and most respected provider of supplemental education in the nation founded in 1977 by professional educators, Dr. Raymond and Eileen *Huntington*. A recent survey by Solomon & Associates revealed that 93% of Huntington families recommend their services to others. *Huntington Learning Center* knows your child can learn and helps each student do better in school. They provide services to students in grades K-12.
